### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose the combination of a programmable memory element structure recited in the base amended claim 21, including the combination of the structure comprising: a first conductive layer formed over a first dielectric layer and in electrical communication with a substrate; a second dielectric layer formed over the first conductive layer and having an opening therethrough; a spacer disposed about a peripheral portion of the opening to form a pore and the pore overlying the first dielectric layer. The prior art of record also fails to disclose the combination of a programmable memory element structure recited in the new claim 61, including the combination of the structure comprising: a first conductive layer lining the sidewall surface of the opening of a first dielectric layer; a second dielectric layer formed over the first conductive layer within the opening; a second conductive layer formed over a top surface of the first conductive layer and a top surface of the second dielectric layer; and a third dielectric layer formed over the second conductive layer, the third dielectric layer having a pore therethrough, and the pore overlying the second dielectric layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
